

PRODUCT SUPPORT BULLETIN BULLETIN NO. 360

DATE: **July 31, 2002**

MACHINE: **TRIPP Tie Inserter/Remover**

SERIAL
NUMBER(S): **760125-760128, 760132-760133**

SUBJECT: **Derail Prevent Kit – 98760007**

This kit has been developed to add an Anti-derail Device to the TRIPP machines shown above. This Anti-derail Device is installed on the front end of the machine folds down over the rail to help prevent the front wheels from derailing during machine operation. It folds up out of the way for travel and for moving through crossings and switches.

The Derail Prevent Kit, p/n 98760007, includes all the necessary parts and installation instructions and can be installed in the field. Installation requires some minor welding and should take about 1 hour to install.

Please contact your NORDCO Representative or the NORDCO Parts Department for pricing and availability.
